Mr. Harold E. Hill
Administrative Vice President
National Association of
Educational Broadcasters
1346 Connecticut Ave. N. W.
Washington 6, D. C.

Dear Mr. Hill:

Please excuse the delay in responding to your letter of December 14, 1961. We have been re-evaluating our position relative to educational television and the value of our membership in the NAEB is unclear at this time. We hope to resolve our strategy in this area in the near future and will at that time have a better understanding of our interest in becoming affiliated with the NAEB.

I appreciate your prompt response to my request for information and again I apologize for the delay in clarifying our interest.

Sincerely yours,

Don M. Muller

Dear Mr. Muller:

Attached is a photo copy of a letter I wrote to you on December 14, in reply to a request from you for information.

Since I have not had the pleasure of hearing from you, I wonder if my letter ever reached you, or, if it did, whether there may be more information I can supply.

In any event, we hope that EMI/US is still interested in becoming affiliated with the NABE, and I'll look forward to hearing from you at your convenience.

Sincerely,

Harold E. Hill

Mr. Don M. Muller, Manager
Product & Market Planning
EMI/US, Ltd.
1750 Vine Street
Los Angeles 28, California

Dear Mr. Muller:

Your letter of November 28, addressed to our Urbana, Illinois office, has been forwarded to me in Washington. I am delighted that EMI/US is interested in becoming an Industrial Associate of the NAEB. We certainly enjoyed our rather brief acquaintance during our recent Convention and hope that you found the exhibit beneficial.

Our annual Industrial Associate dues are \$500. While I will not go into great detail at this time, I would like to mention some of the practical advantages of Industrial Associate membership in the NAEB. Each Industrial Associate receives credit toward the cost of exhibit space at our conventions, receives multiple copies of our periodicals as well as the various reports we publish from time to time, receives special rates for advertising in some of our publications, is listed in a special listing two or three times a year in our Journal, is listed in our Directory of Members, etc. This is a bare outline. In addition, although we do not attempt to persuade our members to patronize our Industrial Associates, it is only reasonable to presume that educational broadcasters, often struggling on minimum budgets, would prefer to give their business to those commercial concerns which have evinced a sincere interest in the welfare and furtherance of educational broadcasting.

In addition, Industrial Associates are considered "members of the family" at our Regional Meetings and Annual Conventions and thus are able to chat more intimately with our members. Also, representatives of our Industrial Associates are involved in (asked to attend) most of our seminar and workshops which are held specifically for our members, and thus can meet with the members on a very informal basis.

I would be happy to provide you with any more detailed information you might desire, either about the NAEB or about the advantages of Industrial Associate membership. I am enclosing a brochure which explains briefly some of the functions of the NAEB. Please let me know if there are any questions.

Sincerely,

Harold E. Hill
Administrative Vice President

Mr. Stephan M. Vener
Market Analyst
EMI/US, LTD.
1750 N. Vine St.
Los Angeles 28, California

Dear Mr. Vener:

Thank you for your letter of October 18, requesting EMI/US S. be placed on our mailing list.

The NAEB is a membership-based organization depending largely on membership dues and fees for support, and as such, is unable to maintain a "free" mailing list.

In view of your interest in educational television we would be very happy to offer your institution an institutional membership or a membership for you yourself, whereby you would receive all our mailings. These mailings include our regular monthly NEWSLETTER, the bi-monthly JOURNAL, and a copy of our Directory of Members published every six months, plus various other reports and surveys mailed to members from time to time.

I am enclosing a list of our publications and a brochure explaining the Association, and would be very happy to answer any further questions you may have.

Sincerely,

Mary Elizabeth McIlvane

Five Prospective Members

May 2, 1962

Mr. Joe S. Sheppard
Sales Engineer
Lenkurt Electric Company, Inc.
361 E. Paces
Ferry Road, N.E.
Atlanta 5, Georgia

Dear Mr. Sheppard:

On February 22 I wrote to you on the suggestion of Raymond Hurlbert pointing out the advantages of Industrial Associate membership in this Association.

Since I had not heard from you, I wondered whether or not you might have further questions. If so, please do not hesitate to get in touch with us. However, if your company is ~~not~~ interested in membership in the NAEB, I would certainly appreciate your letting us know.

Sincerely,

Harold E. Hill
Administrative Vice President

mlm

February 22, 1962

Mr. Joe S. Sheppard
Sales Engineer
Lenkurt Electric Company, Inc.
361 E. Paces
Perry Road, N.E.
Atlanta 5, Georgia

Dear Mr. Sheppard:

Mr. Raymond Hurlbert of the Alabama ETV Commission has notified us of the possibility of Lenkurt Electric Company, Inc. becoming an Industrial Associate of the NAEB. We are very pleased that your company might be interested in associating with the NAEB, and I am enclosing a brochure which briefly outlines the aims and activities of this Association.

While I will not go into great detail at this time, although I will be happy to supply this if you so desire, I would like to mention some of the practical advantages of Industrial Associate membership in the NAEB. The Industrial Associate membership fee is \$500 annually. Each Industrial Associate receives a 25% discount on exhibit space at our annual convention, receives multiple copies of our periodicals as well as the various reports that we publish from time to time, receives special rates for advertising in some of our publications, is listed in a special listing two or three times a year in our Journal, is listed in our Directory of Members, etc. This is a bare outline. In addition, although we do not attempt to persuade our members to buy from our Industrial Associates in preference to other concerns, it is only reasonable to presume that educational broadcasters, often struggling on minimum budgets, would prefer to give their business to those commercial concerns which have evinced a sincere interest in the welfare and furtherance of educational broadcasting. In addition, Industrial Associates are considered "members of the family" at our Regional Meetings and annual Conventions and thus are able to chat more intimately with our members. Also, representatives of our Industrial Associates are invited to attend most of our Seminars and Workshops which are held specifically for our members and thus can meet with the members on a very informal basis.

If Lenkurt Electric Company, Inc. should decide to join the Association as an Industrial Associate, would you please write a letter so indicating? You can enclose a check for \$500 at that time, or you may indicate that you would prefer to be billed for your annual dues and we will handle it in that manner.

Mr. Joe S. Sheppard

September 18, 1963

Mr. Irwin P. Starr
Director of Broadcast Services
Earlham College
Richmond, Indiana

Dear Mr. Starr:

Your letter requesting membership information has been referred to this office. We are very pleased to hear of your interest in organizational membership in the NAEB.

Your station is eligible for Active membership in this Association. Cost of membership within that category is broken down according to the power of the station. I am enclosing a brochure which shows the membership cost for the various classes. Also enclosed is an application for Active membership.

2 The attached brochure will also give you some indication of the services offered by the NAEB to its members. Membership in this association will entitle you to receipt of our monthly Newsletter, bi-monthly Journal, semi-monthly Washington Report, along with various other publications and reports which are sent to our members from time to time. We also retain legal and engineering counsel which enables us to offer limited legal and engineering help to our member stations. Membership would also provide you with the opportunity to attend workshops & seminars and our annual convention, at which you can swap knowledge with other educational broadcasters from all over the world.

If, after reviewing the enclosed materials, you should have any further questions, please do not hesitate to get in touch with us. Also, if you have an immediate interest in using NAEB programming, please let us know. We will contact Mr. Robert Underwood, our Network Manager in Urbana, Illinois who can go into more advantages of Network membership.

We look forward to welcoming you as a new member of the NAEB.

Sincerely,

(Miss) Mary Lynn Moody
Secretary

EARLHAM COLLEGE

RICHMOND, INDIANA

August 29, 1963

NAEB
1346 Connecticut Ave. N.W.
Washington 6, D.C.

Dear Sirs:

Please forward to my office complete information concerning organizational membership in the NAEB.

Earlham's new 10 watt FM station will be in operation soon and we are anticipating using some NAEB programming.

In the future it is possible that the College through the office of Broadcast Services will be in a position to offer some programming to the NAEB. But until this office gets into more complete operation our activities will be limited to providing programs only for our own station and other local stations.

I am also including in this letter my request for an NAEB publication. Sorry I didn't get around to taking advantage of this earlier.

Incidentally let me put in my vote for the revised format of the Journal. I would, however, like to see "About the authors...." preceding each article rather than lumped in the first pages.

Sincerely,

Irwin P. Starr
Director of Broadcast
Services
Advisor to WECI

Mr. Max Rowe
Instructional Television Trust
35 Vitkin Street
Ahuzar, Haifa *Israel*

Dear Max:

I thank you for your letter outlining your progress. You seem to be moving along with considerable dispatch.

I will be pleased to meet with Dr. Blumenthal when he comes to the United States and help him in his tour in any way I can.

✓ The NAEB Constitution provides for the acceptance of membership from foreign broadcasting agencies or installations engaged in educational broadcasting. This is called an International Associate membership, for which the dues are \$250.00 per year. I am asking Miss Moody to send you details, application blank etc. regarding this matter.

Good luck to you and I.T.T.

With warm personal regards,

Sincerely,

William G. Harley

23rd October 1963

Prof. William G. Harley
National Association of Educational Broadcasters
Washington, D.C.

Dear Bill,

I am sure that you will be interested to know how we are getting along. Here is a brief note.

- (a) We have selected the site for the studio centre (near Tel Aviv) and the site for the transmitter (near Jerusalem);
- (b) the architect has completed his preliminary plans of the studio centre;
- (c) on the 26th September, we sent out invitations for tenders to seven firms in the United States, United Kingdom, France and Germany. We expect to receive their tenders by 7th November, 1963;
- (d) after the decision on the tenders, we shall be able to complete the architectural plans (the successful tenderer will undoubtedly ask for a number of architectural changes and facilities). Thereafter we shall be able to prepare, and issue, the building tenders and, hopefully, begin construction in about March/April 1964.
- (e) we have engaged some senior staff, the administration director and the education director. The other senior appointments, the production director and director of engineering will be made abroad and we hope to finalize these in the not too distant future. Our education officer, Dr. P. Blumenthal, will probably go on a study tour (arranged by UNESCO) early in 1964. I shall write to you about his visit to the United States in due course, if I may.

- 2 -

This is a rough breakdown of developments. You can imagine that every step presents its own problems but I hope that we shall solve them one by one.

Soon we shall face the question of engaging junior staff and setting up our own research team from the very beginning. There will still be plenty of excitement, frustration and exhilaration before we shall send out our first telecast.

-

We have formed a special company, as you will see from the notepaper. Let us call it, for short, I.T.T. The Board of the Company consists of

Lord Rothschild, Chairman
Mr. R. Gottlieb
Mr. M. Rowe

We would like I.T.T. to become a member of your NAEB. We discussed this with you at the time and you indicated that this would be possible. Could you kindly let us have whatever forms are necessary for the official application.

I hope that you are keeping well.

Kind regards,

Yours sincerely,

Max.

MEMORANDUM

TO: ALL NAEB ACTIVE, ASSOCIATE, AND AFFILIATE MEMBERS

FROM: Harold E. Hill

RE: Dues for 1964

DATE: December 11, 1963

As explained in the latest Washington Report (which all of you should have received by now), at the time the new organizational structure was approved at Milwaukee, the membership also approved a new dues structure to take effect as of January 1, 1964. We therefore need information from all present institutional members about the categories of membership to which they wish to belong, and information to permit us to know what dues to assess.

MEMBERSHIP CATEGORIES

Institutional - Radio Station Division: Open to institutions and organizations engaged in educational, cultural and public service non-commercial broadcasting over a radio station recognized as under its control by the FCC. (Now classified as Active members.)

Institutional - Television Station Division: Open to institutions and organizations engaged in educational, cultural and public service non-commercial broadcasting over a television broadcast station recognized as under its control by the FCC. (Now classified as Active members.)

Institutional - Instructional Division: Open to institutions and organizations engaged in the production and broadcasting of radio and/or television instructional and/or cultural programs (over stations not under their control), or institutions and organizations operating closed circuit television equipment for direct instructional purposes. (Now classified as Associate members.)

Institutional-Affiliate Membership: Open to institutions or organizations producing or seeking to promote educational, cultural and/or public service programs or broadcasting (but not operating a radio or television station or closed circuit broadcast equipment). This category was established to provide for those present Associate members who feel that they do not want to affiliate with the Instructional Division named above. (Would include some now classified as Associate members, and perhaps some now classified as Affiliate members.)

The Radio Station Division, the Television Station Division, and the Instructional Division will each elect its own Board of six members. The Institutional Affiliate members will be represented

on the NAEB Board of Directors by one Director-at-Large.

Each institution or organization belonging to the NAEB may indicate one or more of the above categories to which it wishes to belong, if qualified. The final determination of eligibility will, of course, rest with the Boards of each Division, or with the NAEB Board of Directors in the case of Institutional Affiliate members.

NEW DUES STRUCTURE

The new dues structure is based on the operating budget of the member. It is recognized that among educational institutions and organizations there are no uniform accounting and budgeting practices. Appropriations budgets do not always reflect the total operating cost of the broadcast budget. For example, whereas community station budgets include items for rent, heat, lights, maintenance, etc., most university station budgets do not reflect these items since they are provided by the general university operating budget. Hence the figure you indicate for your budget should include actual expenditures plus equivalents, such as those just enumerated, staff members paid by other departments, and other similar considerations.

The ranges given in the dues table are large enough so that there should be no real trouble determining a sufficiently accurate figure to establish the appropriate slot. We do not intend to question the budgets reported, and we have to rely completely on your integrity in this matter. If there are questions because of any unusual or special situations, we will be glad to discuss with you what figures you should probably report. Naturally, the figures you report for budget to be used in the assessment of dues will be confidential information and will be treated as such.

Qualified members electing membership in more than one of the enumerated categories must pay dues appropriate for each Division, except that the maximum paid by any one member shall not exceed \$750 annually. Your dues would be based on the portion of the operating budget allocated to each operation, i.e., radio, television, etc.

<u>Operating Budget</u>	<u>Annual Dues</u>
Less than \$25,000	\$100
\$25,000-99,999	200
\$100,000-249,999	300
\$250,000-499,999	400
\$500,000 and over	500

BILLING

We realize that problems may arise at some member institutions in regard to billing for the new dues. We will be happy to bill you in any way you designate - as dues (separately by Divisions, or in a lump sum, whichever you desire) fees, service fees, or what-have-you. We would naturally prefer to bill you annually, but if absolutely necessary we can arrange to bill you semi-annually or quarterly. In

other words, we will attempt to bill you in the mannèr which will make it easiest for you.

Please fill out the attached form and return it so that it arrives in Washington Headquarters not later than December 28, 1963 so that billing may be made in January. If you care to include a check for your dues with the attached form when you return it, please do so -- it will save an extra step.

NAEB Headquarters
1346 Connecticut Avenue

December 31, 1963

Mr. Shigeru Matsuzawa, President
Duropa Eiga Boeki Limited
Kuriyama Building No. 6
6-Chome Ginza Higashi
Chuo-Ku, Tokyo, Japan

Dear Mr. Matsuzawa:

We were glad to hear of your interest in the National Association of Educational Broadcasters and hope that we may be able to add your name to our growing list of foreign members.

Under our new organizational structure we have established an Associate category which will include several sub-divisions to take care of Industrial Associates, Sustaining Members, International Affiliates, and other institutions and organizations which do not readily fall into the regular membership categories.

The specific requirements for each of the sub-divisions within the Associates category, and the dues therefore, will have to be established by the new Board of Directors after it is constituted under the re-organization plan. This means that it is probable that specific qualifications and dues will not be established for another 60 to 90 days.

In the meantime, if you are interested in membership we would be happy to add your name to our mailing list to receive our materials regularly. As an Associate member you would be entitled to receive our bi-monthly Journal, monthly Newsletter, Washington Reports, and all other materials which the NAEB distributes from time to time. Then as soon as the new board of Directors makes the necessary decisions, we will notify you as to which category we believe you belong in, and at that time indicate what you dues will be. You will then be able to determine whether you feel that the services to be offered will be sufficient to warrant the dues you will be asked to pay.

We hope to hear from you soon.

Sincerely,

Harold E. Hill
Vice President

Where is our original letter?

March 9, 1964

Mr. Max Rowe
Instructional Television Trust
35 Vitkin Street
Ahuza, Haifa
Israel

Dear Mr. Rowe:

We are very sorry that the reorganization of the membership structure of the NAEB delayed our sending you information about membership for the Instructional Television Trust.

Our Executive Committee has met within the past few weeks and established an Associate category to include International Associates, Industrial Associates, Education Associates, plus various other types of membership which do not readily fall into our Institutional membership.

We are very happy to hear that Instructional Television Trust would like to affiliate with the NAEB. The dues for International Affiliates are \$250 annually. I assume that Mr. Harley has already discussed the advantages of membership in the NAEB with you; however, please do not hesitate to get in touch with us if you would like more information.

We would consider it an honor to welcome Instructional Television Trust as the newest International Affiliate of the NAEB, and look forward to hearing from you soon. Since there is no membership application needed for this category of membership, you will be placed on our membership list as soon as we get definite word from you that you wish to join.

Sincerely,

(Miss) Mary Lynn Moody

April 15, 1964

Dr. Eugene S. Foster
Director of Television
Brooklyn College
Brooklyn 10, New York

Dear Gene:

It is always a little difficult for me to be coldly specific about the advantages of NAEB membership, because I have lived so close to it for so long, but I certainly agree that the new dues might give one pause to ponder whether or not membership is worth the tariff.

I am sure you are rather familiar with the sort of services we have provided for the general educational broadcasting movement over the years. For example, our efforts on behalf of the Educational TV Facilities Act which provides \$32 million for the construction of ETV facilities. We prepared detailed information for the congressional committees which held hearings on the matter, we provided testimony, and we brought into Washington, at our expense, several "lay" leaders from around the country to explain what ETV would mean to their communities.

Our TV allocation studies have been accepted by the FCC as a part of alternate plan to the one they have proposed for allocations, and this will undoubtedly result in the reservation of many more ETV channels than is now the case.

We have been involved very much in the matter of the new copyright law, and with other educational interests are working with the Copyright Office to try to assure that the proposed new copyright legislation will not have the dreadful adverse effect on educational use of material (not just broadcast) that it has suggested might be the case.

We are currently completing a study on disseminating in try to understand television's needs in this area. There has been much talk about various plans to try, and we have learned that, for example, some of the most important things we can do to provide better facilities and services to our members is to make sure they are properly informed in general, and that the information we put in the field of education and television is not only better informed but also that we can make

are, and this is carried over into needs so far as equipment is concerned, so that manufacturers might know more about the specialized needs of education.

But, perhaps you are more concerned about the specific kinds of things we think the NAEB can do for those who might join the Instructional Division. However, as Bill Harley has often said, "the rising tide raises all the boats," and we feel that the general work we do for educational broadcasting in its many parts will help all those parts to some degree.

We held a conference on instructional television at the University of Illinois last spring, and we held another just last month, at which some 150 people engaged in ITV in some way or another met and discussed their problems and got the advice of consultants whom we brought in. There is currently another such conference tentatively planned for somewhere in the southeast next fall.

We, in cooperation with other educational media people, are currently working with the school administrators on methods of further cooperation and, even more important, on the manner in which we might better educate school and college administrators as to the benefits of television and the other media.

We are currently engaged in a \$100,000 project to prepare six color half-hour films on utilization which are designed to help inform teachers and administrators how they can make the best use of television in instruction. These films will be available to NAEB members sometime next fall to show to the people they want to "educate,"

Some of the detailed specifics of what our new Instructional Division will provide in the way of services will have to wait until the Board meets in Columbus the early part of next month. Already this Board has met and agreed on a regular newsletter which will be sent to all members. Enclosed is the first copy of that newsletter. In general, it is hoped that we can help provide information on utilization (in addition to the above mentioned films), help in training and finding qualified people, bring about better relations with administrators, issue "how-to-do-it" manuals of one sort or another, and so on. More of these details are worked out each time the Board meets, and the attached newsletter will give you an idea of the scope of the Board's interest.

I trust that this answers some of the questions you had in mind, and I really feel that any institution engaged in ETV will profit from membership. I might add that, even with the increased dues, the membership does not fully support the operation of the NAEB. We still need to get thousands of dollars every year from other sources - project grants and so on - and this is difficult when you realize that we have had no major foundation support for several years.

It is now possible that some information, known to the State, may have been at the disposal of the Government in connection with the case.

Respectfully,

David P. Hill
Vice President

HHH/sls

Associate*

May 29, 1964

Mr. George Gerbner
Institute of Communications Research
The University of Illinois
Urbana, Illinois

Dear Mr. Gerbner:

Mr. Hill is away from the office at present so your letter of May 20 has come to my attention.

The cost of Educational Associate membership in the NAEB is \$35 a year. This category of membership was established after the reorganization when our Executive Committee realized that the new NAEB structure had not really provided a "home" for organizations such as the Annenberg School which do not produce programs on a regular basis.

The services the Educational Associates receive are the same as they are for the institutional members. You will receive copies of our monthly Newsletter, bi-monthly Journal, and semi-monthly Washington Report ~~AND~~ you will have an opportunity to attend workshops, seminars and our annual convention at which you can swap information and knowledge with other educators from all over the world.

We hope that the Annenberg School will be able to continue its membership in this new category.

Sincerely,

(Miss) Mary Lynn Moody
Secretary to Harold Hill

Washington 36, D.C.

Dear Harold:

It was good to see you at Cherry Hill.

Charles Lee sent me your letter of May 5 and the institutional affiliation form. The only category for which The Annenberg School would be eligible at the present time is Educational Associate. However, there is no such category on the form, nor any information about the cost and advantages of such membership. Could you enlighten me?

Sincerely yours,

George Gerbner

Proposed Member

July 30, 1964

Mr. Irving Kahn
Sales Manager
Acme Film Laboratories Inc.
1161 North Highland Avenue
Hollywood 38, California

Dear Mr. Kahn:

Reference is made to your recent exchange of correspondence with Mr. Gerard Appy of our Educational Television Stations Division.

Business concerns may affiliate with the NAEB in either one of two categories. Those engaged in the manufacture, distribution, or sales of broadcast and related equipment and supplies may become Industrial Associates, while other business firms, without such specific involvement in broadcast equipment, may become Sustaining Associates. I believe, from your letter, that Acme Film Laboratories, Inc., fits into the latter category.

The NAEB is the only professional and trade association serving the field of educational broadcasting. Our members represent more than four hundred educational radio and television stations, production centers, and closed circuit installations; more than 1500 individual members who are engaged in or seeking to promote educational, cultural, and public service broadcasting; and over one hundred schools, universities, associations, commercial stations, and industrial firms who are a part of the expansion and development of education via the broadcast media. I am enclosing a booklet which will tell you more about the aims and activities of the Association. Also enclosed are copies of some of our publications.

As a Sustaining Associate, your company would be joining such firms as commercial stations, National Community Television Association, the Educational Radio Network, the National Audience Board, and the National Broadcasting Company.

Our Sustaining Associates, as a contribution to the national educational broadcasting movement, pay dues of \$200 annually. Industrial Associates pay \$500 annually. Sustaining and Industrial Associates also receive certain tangible benefits in return for these dues.

July 30, 1964

A brief summary of these benefits would include: multiple copies of our periodicals as well as the various reports we publish from time to time; special rates for advertising in some of our publications; listing in our membership Directory; and, perhaps most important, becoming "part of the family" at our Regional and National meetings, thus permitting more informal and intimate conversations with our members. Representatives of our Sustaining Associates are also invited to attend most of our seminars and workshops and thus meet with NAEB members on a very informal basis. In addition, although we do not attempt to persuade our members to patronize our Sustaining and Industrial Associates in preference to other concerns, it is only reasonable to presume that educational broadcasters, often struggling on minimum budgets, would prefer to give their business to those commercial concerns which have evinced a sincere interest in the welfare and furtherance of educational broadcasting.

We hope that you will consider affiliating with us in the educational broadcasting movement. If you have further questions, please do not hesitate to get in touch with me.

Sincerely,

William G. Harley

Hollywood 38, California

Dear Mr. Kahn:

Mr. Fletcher has asked me to answer your letter of July 16 inquiring about this organization, Educational Television Stations. I am happy to do so.

First I should advise you that ETS is a division of the National Association of Educational Broadcasters and membership within this particular division is limited to the educational television broadcasting stations specifically. However, I believe you might be interested in and might benefit from membership in the National Association of Educational Broadcasters itself, since this Association embraces all the major types of non-commercial broadcasting and the individuals who are engaged in this work.

N.A.E.B. has a number of associate members and within this category both industrial and sustaining memberships are possible. I am asking the President of N.A.E.B., Mr. William Harley, to write you about this possibility. I have also said that he would be happy to see you when you are next in Washington, D.C. The ETS Division offices are in the same suite and if you visit here I would welcome the opportunity to meet you.

Cordially,

Gerard L. Appy

Educational Television Stations
1346 Connecticut Avenue, N.W.
Washington, D.C.

Dear Mr. Fletcher:

Let me introduce myself as Irving Kahn, Sales Manager of
Acme Film Laboratories, Inc.

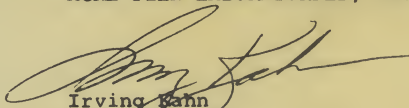

After reading the Audio-Visual Instruction magazine for
June, 1964, I see there is a new organization called
"Educational Television Stations". We would be very in-
terested in finding out more about your organization and
if possible become a member. We are presently a member
of a division of NEA, the DAVI. I, myself, am a member
of the Board of Directors of Brooks Institute of Photo-
graphy and a director on the Council on Medical Television
located at Duke University.

We are a film processing laboratory with complete video
tape transfer facilities. This includes transferring any
type of video tape to film either 16mm or 35mm, black and
white and 16mm color. We have been doing work for a great
many of the educational institutions throughout the United
States for approximately 5½ years.

We would be very interested to hear from you prior to my
coming East about September 22nd, regarding your organi-
zation.

Sincerely,

ACME FILM LABORATORIES, INC.

Mr. Harold F. Pyke Jr.
TV Project Coordinator
Bingham Associates Fund
Tufts-New England Medical Center
Boston, Massachusetts 02111

Dear Mr. Pyke:

Your letter of August 12, addressed to Mr. William Harley, hasvbeen referred to me.

We are very pleased to hear of your interest in becoming a member of the NAEB. Enclosed is a broshhre which briefly describes the aims, activities and purposes of the NAEB. If after reviewing this booklet, you should have any questions, please do not hesitate to get in touch with me.

We would be delighted to have the Bingham Associates Fund join the NAEB as an Educational Associate member. This is a special category of membership established within the NAEB for those associations and institutions which,although not directly involved in broadcasting and production, have an interest in educational broadcasting. Educational Associate dues are \$35 annually. This fee entitles you to receipt of our monthly Newsletter, bi-monthly Journal, semi-monthly Washington Report, plus various other publications which are sent to our members from time to time.

You do not have to complete an application form to be eligible for this membership. A letter from you indicating a decision to join will suffice.

I have asked that the convention information be sent to you, and assume that you have received it by now. We hope that you will be able to attend.

We look forward to hearing from you and to welcoming you into the NAEB.

Cordially,

Harold E. Hill

Dear Mr. Harley:

My associates with the Bingham Associates Fund and I would like information concerning application for membership in the NAEB. At a meeting of the Council on Medical Television in Atlanta this spring, information about the NAEB was available, but we seem to be missing this from our files. Any general information you would like to include would also be appreciated.

I understand that the NAEB is holding its annual meeting in October. We would also appreciate having material concerning the meeting. Having been in etv for a number of years, and now in the field of medical communications, I might like to consider attending.

Thank you very much.

Sincerely yours,

MEMORANDUM

TO: NAEB-ETS Members, NAEB-NER Members, NAEB-INSTRUCTIONAL DIVISION Members

FROM: William G. Harley

DATE: October 27, 1964

This material is sent to assist you and to help this office in properly establishing membership for your institution(s) in the NAEB. Please fill in the spaces where information is requested and do not hesitate to ask any questions you may have. The first attached sheet gives general information about the new billing procedures.

Please note that if your institution is joining NAEB and only one of its divisions (ETS, NER, or the Instructional Division,) you need be concerned only with the page headed with the name of your division.

Institutions joining NAEB and more than one of its divisions should fill in the pages for the appropriate divisions. In cases of multiple membership, no member will be asked to pay basic NAEB dues (exclusive of division dues) in excess of \$750 per year. If the budget categories you check for multiple division membership total more than \$750, you will still be billed only for that amount.

Should you not intend to retain any portion of your membership, please be kind enough to indicate this on the appropriate page(s) and return it (or them) to us.

If you have any special instructions to give us regarding wording of the billing statement, or if you wish to make payment on any basis other than the total amount, please so indicate on the proper page(s). If you care to enclose a check for your dues when you return the appropriate form(s), please do so -- it will save an extra step.

GENERAL INFORMATION REGARDING DUES

A new billing procedure for NAEB dues and fees will be instituted this winter, according to NAEB President William G. Harley. The new system is intended to combine all NAEB dues and division fees into one sum, and, eventually, to shift the billing period from the present calendar year basis to a fiscal year basis.

As a first step toward the latter goal, NAEB-ETS (Television Stations Division) members are being billed for NAEB dues and division fees for the six month period, January 1 - June 30, 1965. These members will then be billed for a full year as of July 1, 1965, thus putting them on a fiscal basis.

Members of NAEB-NER (Radio Division) and the Instructional Division are being billed for the calendar year, January 1 - December 31, 1965, at this time but will be billed for only half a year next winter, thus allowing them to begin fiscal year billing as of July 1, 1966. This will be especially beneficial to the members of the NER Radio Network who already pay their network fees on a fiscal basis.

The changeover to the fiscal billing period is being made gradually to ease the administrative problems involved.

As rapidly as possible the billing procedure will provide for billing each member for all services in one sum, combining television, radio, and instructional billings (or such as are applicable). However, details will be provided if requested by the member and billings will continue to be made for periods other than a year if members desire to have the billing broken down into more than one payment.

Anyone with questions about their assessment should write to Harold Hill, NAEB Treasurer at the Washington office.

NAEB

EDUCATIONAL TELEVISION STATIONS DIVISION

The new membership fee structure for stations joining NAEB and the Educational Television Stations division is a single total amount based upon population within the Grade A contour of your station(s). Our station population coverage figures indicate that your total annual fee is _____. The portion of this _____ which is assigned as basic dues support to the Association is determined on the basis of your annual budget for the operation of your station(s).

Please check the appropriate space in the following table. NOTE: If your total budget includes funds for educational radio, closed circuit television, or other activities not connected with television station broadcasting, delete those funds from your budget total in determining the proper space to check.

<u>Operating Budget</u>	<u>Annual Dues</u>	<u>Please check</u>
Less than \$25,000	\$100	_____
\$25,000-99,999	200	_____
\$100,000-249,999	300	_____
\$250,000-499,999	400	_____
\$500,000 and over	500	_____

As the ETS division is making a transition to a fiscal year plan, your NAEB-ETS billing for Jan.- July 1965 will total one-half of the annual amount, or _____.

Official Representative _____

Special billing instruction _____

NAEB

INSTRUCTIONAL DIVISION

Dues for the Instructional Division remain the same as they were last year, with the amount based on the annual budget for your instructional activities through television and/or radio, as indicated in the table below. (The same categories apply to all NAEB Divisions.)

It is recognized that among educational institutions and organizations there are no uniform accounting and budgeting practices. Appropriations budgets do not always reflect the total cost of the operation. For example, most university and school system CCTV budgets would not include items for rent, heat, light, maintenance, etc. Hence the figure you indicate for your budget should include actual expenditures plus equivalents, such as they enumerated, staff members paid by other departments, and other similar considerations. We do not intend to question budgets reported, and we have to rely completely on your integrity in this matter. If there are any questions because of unusual or special situations, we will be glad to discuss with you what figures you should probably report. Naturally, the figure you report will be confidential information and will be treated as such.

Please fill in the form below, and return this sheet to Washington Headquarters so that it arrives not later than November 20, 1964.

<u>Operating Budget</u>	<u>Annual Dues</u>	<u>Please check</u>
Less than \$25,000	\$100	_____
\$25,000-99,999	200	_____

Prospective Member

September 2, 1964

Mr. Duncan Whiteside
Director of Broadcasting
Box 5
University, Mississippi 38677

Dear Mr. Whiteside:

We were very pleased to receive your letter of August 25 in which you indicated that The University of Mississippi is interested in membership in the NAEB. I am enclosing a brochure which describes in brief the aims, activities and purpose of this Association.

Also enclosed is a memorandum which was sent to all our members last December when the membership structure of the NAEB was changed. Since we are not familiar with your broadcast activities, you will have to indicate on the attached form which category you are eligible to join. You will note that the dues structure is based on the operating budget of the member. These budgets are treated as confidential information and information about them is not released by this office.

If you do not produce programs, or broadcast at the University of Mississippi, the University would be eligible for an Educational Associate membership. This is a special category set up for those institutions and associations which are simply interested in educational broadcasting. Educational Associate dues are \$35 annually.

Membership in the NAEB would entitle you to receipt of our monthly Newsletter, bi-monthly Journal, semi-monthly Washington Report, plus various other publications and circulars which are sent to our members from time to time. Official representatives of member institutions can attend our annual convention at a reduced rate. We retain legal and engineering counsel which enables us to offer limited legal and engineering help to our member stations. Membership would also provide you with the opportunity to attend workshops and seminars at which you can exchange information with other broadcasters from all over the country.

There are many other services which we have provided for the general educational broadcasting movement over the years. For example, our efforts on behalf of the Educational TV Facilities

September 2, 1964

Act which provides \$32 million for the construction of ETV facilities. We prepared detailed information for the congressional committees which held hearings on the matter, we provided testimony and we brought into Washington, at our expense, several "lay" leaders from around the country to explain what ETV would mean to their communities.

We have been very much involved in the matter of the new copyright law, and with other educational interests are working with the Copyright Office to try to insure that the proposed new copyright legislation will not have the dreadful adverse effect on educational uses of material (not just broadcast) that it first appeared might be the case.

We are currently conducting a study on microwaving to try to determine education's needs in this area. There has never been much thought given to this, and yet these channels, too, are becoming scarce. In addition there seems to be evidence that the present bandwidth does not provide enough resolution and definition to adequately convey the detail necessary in certain educational transmissions, such as in the field of medicine and other sciences. We are hoping to determine just what the real needs are/

We are currently engaged in a \$100,000 project to prepare six color half-hour films on utilization which are designed to help inform teachers and administrators how they can make the best use of television in instruction. These films will be available to NAEB members sometime next fall to show to the people they want to "educate."

I trust this will give you some idea of the kinds of services rendered by the NAEB. If I can provide any other information, please do not hesitate to let me know. The tentative convention program and reservation cards which you requested are enclosed.

We look forward to welcoming you into the NAEB.

Sincerely,

Harold E. Hill

JOHN STUART

DIRECTOR

MARKETING RESEARCH AND PLANNING
INTERNATIONAL CORRESPONDENCE SCHOOLS
INTERNATIONAL EDUCATIONAL SERVICES
SCRANTON 15, PENNA.

File - Report

October 26, 1964

Mr. John Stuart, Director
Marketing Research and Planning
International Correspondence Schools
International Educational Services
Scranton 15, Pennsylvania

Dear Mr Stuart:

Mr. Jack Summerfield, General Manager, Riverside Radio, WRVR, New York City, has indicated that the International Correspondence Schools might be interested in becoming affiliated with the National Association of Educational Broadcasters.

I believe Mr. Summerfield discussed with you the possibility of Industrial Associate membership. However, this category is restricted to firms engaged in the manufacture and/or sale of broadcast and auxiliary equipment.

However, your organization is eligible to becoming Sustaining Associates, as this category is open to firms interested and involved in educational broadcasting, but not eligible to become Industrial Associates. Incidentally, Sustaining dues are only \$200 annually, whereas Industrial dues are \$500.

The National Association of Educational Broadcasters is the only professional and trade association serving the field of educational broadcasting. Our members represent more than four hundred noncommercial radio and television stations, production centers, and closed-circuit educational broadcasting installations; more than one thousand individual members who are seeking to promote education, cultural, and public service broadcasting; one hundred or so schools and universities, associations, commercial stations, and industrial firms who are a part of the expansion and development of education via the broadcasting media.

It would be a pleasure to welcome International Correspondence Schools into the NAEB as a Sustaining Member. As a Sustaining member you would be entitled to receive two copies of our periodicals as well as the various

Mr. Stuart (con't)

October 26, 1964

reports we publish from time to time, receive special rates for advertising in some of our publications, are listed in our Directory of Members, etc. This is but a bare outline of the benefits membership in the NAEB will provide. Although this intangible benefit of membership is not really very important to your business, you should know that, although we do not attempt to persuade our members to patronize our Sustaining Members in preference to other concerns, it is only reasonable to presume that educational broadcasters, often struggling on minimum budgets, would prefer to give their business to those organizations which have evinced a sincere interest in the welfare and furtherance of educational broadcasting. Membership in this Association would also entitle you to attend our Regional meetings and annual Conventions and thus be able to chat more intimately with our members. Representatives of our Sustaining members are invited to attend most of our seminars and workshops and thus meet with NAEB members on a very informal basis.

I hope it will be our privilege to welcome International Correspondence Schools into our Association. If you have further questions, please do not hesitate to get in touch with me.

Sincerely,

Harold E. Hill

November 3, 1964

Mr. Harold E. Hill, Vice President
NATIONAL ASSOCIATION OF EDUCATIONAL BROADCASTERS
1346 Connecticut Avenue
Washington, D. C.

Dear Mr. Hill:

I forwarded your letter describing your Sustaining Associate program to Mr. Pat Fischetti in our special services division. The use of FM and TV in education and training comes under Pat's supervision. At the moment (and for the next while) he is so busy getting the initial organization work completed that he can't even consider memberships.

Pat did say that he wanted me to be sure and invite you to visit us and see a demonstration if you are ever in the Scranton area. Jack Summerfield, Jim Fellows and Jerrold Sandler would also be interested. We would be most pleased to put on a demonstration of the equipment for all or any of you any time after November 10.

Thank you very much for thinking of us.

Sincerely,

December 22, 1964

Mr. David Yellin
Radio and Television
Department of Speech and Drama
Memphis State University
Memphis, Tennessee

Dear Mr. Yellin:

Enclosed is a brochure describing, generally, the activities and purposes of the NAEB, plus a mimeographed description of the four major divisions. We have not written material about the educational associate membership since it was set up as a category for such national organizations as NEA, the League of Women Voters, ASCD, etc., and as a "stop-gap" category for educational institutions in the early stages of planning a broadcast or closed-circuit operation. Actually, this category is not even specifically provided for in the By-Laws, and we have not "pushed" membership in it; therefore, we have not printed materials relative to this category.

I am sure you realize that Memphis State University will have to transfer to one of the four major categories when it actually begins to operate either a closed-circuit or broadcast facility or produces programs of an instructional or cultural nature on a regular basis for transmission over some other outlet. In fact, if you are regularly producing programs for WKNO, you would not be eligible for educational associate membership.

No application form is necessary for you to join. All we need is a letter from you stating your interest in joining and outlining your plans for the future in the educational broadcasting field. We may either send along a check for \$35 for 1965 dues, or we will be happy to bill you.

I am asking our Research & Development office to answer your questions about the establishment of closed-circuit television on your campus. I am sure you will hear from them in the near future.

Sincerely,

Harold E. Hill

December 16, 1964

Mr. Harold E. Hill
NAEB
1346 Connecticut Avenue, N. W.
Washington, D. C. 20036

Dear Mr. Hill:

When I buttonholed you once in Austin at the Convention, you suggested I write you about Memphis State University becoming affiliated with NAEB. As I look over the requirements for the various divisions, I believe our University would qualify as an Educational Associate. Would you, therefore, please send me whatever information and forms necessary so that I can make my presentation.

Also, I would appreciate any help you and yours could give me on the ways and means for beginning a closed-circuit television operation on our campus. I would like to have literature on various systems, as well as on the kinds of organization and operation for such a facility. In addition, I am most anxious to find out what financial help we can get -- and from whom -- on the purchase of equipment.

As you might gather from my requests, television is about to sprout at Memphis State. And, accordingly, I am very grateful for your organization and would greatly appreciate your aid and comfort. Best wishes.

Sincerely,

David Yellin

Mr. Richard J. Meyer
Project Director
Television Coordinator
Great Neck Public Schools
Great Neck, New York

Dear Dick:

Enclosed is the information you requested about the various categories of institutional membership in the NAEB. I am also enclosing a somewhat outdated general brochure about the NAEB and its aims and purposes. I believe this information will enable you to determine what category of membership Great Neck Public Schools should belong to, but if you have specific questions, please let me know.

No formal application is needed for membership. If you want to join, just send us a rather detailed letter outlining your present operation and your plans for the future.

Sincerely,

Harold E. Hill

File Prospective Members

January 26, 1965

Mr. Lee B. Spencer
Librarian
The Arkansas State Teachers College
Conway, Arkansas

Dear Mr. Spencer:

I believe that your library would qualify as an Educational Associate of the NAEB, the dues for which are \$35 per year. This category is open only to institutions and organizations with an interest in educational radio and television, but who do not actually operate any radio and/or television facilities, either broadcast or closed-circuit, nor produce educational programs on a regular basis for broadcast on any station.

Actually, it would be The Arkansas State Teachers College which would be the member of the NAEB and not just your library since our membership is open only to educational institutions and organizations.

As an Educational Associate you would regularly receive our Journal, Newsletter, Washington Report, and other publications which we issue from time to time. If your institution decides to become an Educational Associate of the NAEB, a letter to that effect will suffice. The letter should include a brief description of your interest and involvement in educational broadcasting, and should designate a person to be the official representative of the institution in its relations with the NAEB. You may either enclose your check for \$35, or we can bill you.

If you have any further questions, please do not hesitate to get in touch with me.

Sincerely,

Harold E. Hill

Gentlemen:

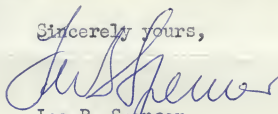

The Arkansas MTV activity is to be located on the campus of this institution.

This library hopes to augment as fully as possible its resources in the field of educational television. From information received from Urbana we plan to order back issues of the NAEB Journal.

The purpose of this inquiry is to ask whether you would recommend an organizational membership for our library and if so, what the annual cost would be?

Any additional advice and/or assistance you can and will furnish us will be greatly appreciated.

Sincerely yours,

Lee B. Spencer

Mr. Stuart A. Selby
Assistant Professor of Education
University of Saskatchewan
Saskatoon, Canada

Dear Mr. Selby:

First let me apologize for our not responding more quickly to your letter of December 15. I believe each of three people automatically assumed that someone else was going to handle it and, therefore, none did.

At the present time, the entire matter of membership in the NAEB by organizations and institutions from other countries is under study by a membership committee of our Board of Directors. Prior to our reorganization in 1963 we had permitted Canadian institutions to belong to the NAEB in certain categories of membership, but the reorganization made Canadian memberships somewhat more complicated. We certainly want to encourage as many Canadian institutions as possible to join our Association and are attempting to work out the best possible plan. If you will bear with us a while longer, I will inform you of the Board's decision as soon as possible.

Sincerely,

Harold E. Hill

Mrs. Carolyn Templeton
Member Relations
National Association of Educational Broadcasters
119 Gregory Hall
Urbana, Illinois 61801

Dear Mrs. Templeton,

Approximately one year ago I wrote to Mr. Harold E. Hill stating that the US Army Signal Center and School would be unable to continue its membership in the NAEB because of the change in membership categories and the cost of such a membership to the school. Mr. Hill's reply dated January 20, 1964, indicated that they were aware of the problem confronting military schools who used closed circuit TV and who desired to continue some affiliation with the NAEB. He also indicated that some arrangement might be worked out to include military members in a special category, but that our membership would be continued in an unofficial manner and we would be kept on your mailing list. Has anything further developed along this line?

While you requested the name of our TV coordinator, I would rather that you address future correspondence to Mr. Murray Tesser, Deputy Chief, TV Division, Office of Academic Operations, US Army Signal Center and School, Fort Monmouth, N. J. 07703.

We will encourage individual membership in the NAEB if this is possible. Perhaps in your reply to Mr. Tesser you could send such information as well as information pertinent to the question I asked above.

Sincerely,

NEIL G. SMITH

USCONARC
Fort Monroe, Va. 23351

Dear Tom,

The question of membership in the NAEB has come up again. In discussing this with Major Colville and later briefing General Brown as to what the situation was, I wonder whether or not it wouldn't be possible for you to suggest a CONARC membership in the NAEB with the understanding that all CONARC schools could participate to the extent that this would seem desirable.

We discontinued our school membership last year because of the increase in dues. We are encouraging two people to take out individual memberships. The idea of having a CONARC membership though, if it were possible, would insure that all schools would have this organization as a source of information in the use of TV for education and training purposes.

Sincerely,

NEIL G. SMITH

DEAR MR. JORDAN:

THANK YOU FOR YOUR LETTER OF FEBRUARY 23 WHICH REACHED ME ONLY YESTERDAY IN REGARD TO THE INSTITUTIONAL MEMBERSHIP IN THE NAEB FOR YOUR INSTITUTION.

I APPRECIATE YOUR EXPLANATION AND CAN UNDERSTAND YOUR HAVING TO DROP THE MEMBERSHIP. REGRETFULLY I AM REMOVING YOUR NAME FROM OUR LIST OF INSTRUCTION MEMBERS.

THERE IS ANOTHER TYPE OF MEMBERSHIP, EDUCATIONAL ASSOCIATE, DUES FOR WHICH ARE \$35.00 IN WHICH YOU MIGHT BE INTERESTED. HOWEVER, ONLY ONE SET OF PUBLICATIONS ARE SENT EACH ISSUE AND THIS IS NOT A VOTING MEMBER IN AFFAIRS OF THE ASSOCIATION. IT IS VERY COMPARABLE TO INDIVIDUAL MEMBERSHIP BUT FOR THE INCREASE IN DUES. I AM ENCLOSING ADDITIONAL APPLICATIONS FOR INDIVIDUAL MEMBERSHIP IN CASE ANY OF YOUR STAFF WOULD WISH TO USE THEM.

IN THE MEANTIME, AS YOU KNOW, YOU ARE MOST WELCOME TO ATTEND OUR ANNUAL CONVENTION OR ANY SPECIAL CONFERENCES. I HOPE IT IS POSSIBLE FOR YOU TO ATTEND THE INSTRUCTION CONFERENCE IN MIAMI LATER THIS YEAR. THE NEWSLETTER WILL CARRY NOTICES OF ANY UPCOMING MEETINGS.

THANK YOU AGAIN FOR THE COURTESY OF YOUR REPLY AND I AM SORRY FOR THE INCONVENIENCE I HAVE CAUSED YOU.

SINCERELY,

Dear Bill:

I hope that you will be able to attend the Region II meeting in Williamsburg, and if so, will look forward to chatting with you at that time.

I thought, while it was fresh in my mind, that I would drop you a line and send you a copy of a letter I received from the education coordinator at one of our schools. It is self-explanatory as to the recommendations. You will probably recall that this problem was part of our discussion several months ago in your office. It is impossible to pay for organizational memberships for military installations under the present set up of dues, etc. The suggestion that USCONARC join as an organization, and then assist its member schools, may or may not be a valid suggestion. I would have to investigate this possibility. At any rate, I think is worthy to note the kind of interest we have in your organization.

Hope to see you in Williamsburg.

Sincerely,

Tom

Mr. Neil G. Smith
Education Coordinator
US Army Signal Center & School
Fort Monmouth, New Jersey 07703

Dear Mr. Smith:

Your letter to Mrs. Dorothy Templeton has been forwarded to this office.

We have not given up on the matter of including military installations in the NAEB under some special category of membership. One of our problems is that many of our members who operate on a very limited budget are dismayed by the fact that military operations, with larger budgets, might pay a smaller membership fee. This, of course, has to be one of our considerations.

We have referred the matter to a special Membership Committee which has been appointed by the NAEB Board. They are, at present, deciding what feasible solution can be reached since there are several military installations which have expressed a desire to join the NAEB. Naturally, we are most anxious to have them eligible for membership.

We will contact you as soon as a decision has been made regarding a special category of membership. Meanwhile, if you have any questions, please let us know.

Sincerely,

Harold E. Hill

INTER-OFFICE MEMORANDUM

TO: MR. HILL

FROM: DOTTY

DATE: 3/9/65

I HAVE WRITTEN ABOUT A DOZEN INSTRUCTION MEMBERS WHO HAVE BEEN CARRIED FOR THE PAST YEAR AND MORE, SINCE 1/1/64, BECAUSE SO FAR AS I KNEW THERE HAD BEEN NO CORRESPONDENCE BETWEEN THEM AND US AND NO REPLY TO OUR MEMO ABOUT MEMBERSHIP DIVISIONS LAST YEAR.

THIS IS ONE REPLY. HAS ANYTHING BEEN DONE ABOUT MILITARY MEMBERSHIPS YET? THE AIR FORCE ACADEMY IS JOINING.

March 16, 1965

Mr. Thomas J. Dolan
ATIT-SCH-EV
USCONARC
Fort Monroe, Virginia 23351

Dear Mr. Dolan:

Bill Harley has asked me to reply to your letter of March 4 regarding military membership in the NAEB.

We are still working on this problem as explained in the attached copy of the letter to Neil Smith. Perhaps you and Bill will have a chance to discuss this further at the Region II meeting in Williamsburg the end of this week.

As I explained to you here in the office, it is extremely difficult for us to justify to our other members a special rate for military members; however, we are working on this and hope to have a report from our Board Committee in the near future.

It might be possible for USCONARC to join on behalf of its member schools, but it would be difficult for us to provide sufficient materials for distribution to all such schools.

As you probably know, definite plans have been made for holding the Armed Forces Television Conference in conjunction with the NAEB convention this fall. We are working with Bob Wood and others and hope that this can become an annual cooperative venture. We are acutely aware of the extremely valuable work being done in educational Television by the Armed Services, and we really do want to bring them into the membership. But, as I say, this delay is caused by the working out of details.

Sincerely,

Harold E. Hill

Mr. Jack Crannell
Director of Broadcasting
Miami-Dade Junior College
11380 N.W. 23rd Avenue
Miami, Florida 33167

Dear Jack:

You will recall that, in an earlier letter, Bill Harley indicated I would send you information about membership for Miami-Dade Junior College.

As you know, we have four institutional categories of membership: those with television stations may belong to ETS; those with radio stations belong to NER; those producing programs (either for use on their own CCTV systems or for broadcast on another outlet) for direct instruction may belong to our instructional division; and those producing programs or utilizing CCTV for general adult audiences may belong as Institutional Affiliates.

I am enclosing some mimeographed information about these various membership categories and the dues structure which is common to them all. Since I don't know how far you've progressed with your plans, I can't tell what category you should be in. But these materials should help you make some decision. Please let me know if you have any questions after reading the attached. We certainly hope you folks will get on the NAEB bandwagon as soon as possible.

Yes, Sandy is now in stewardess training school in Kansas City. She graduates on April 1, and has enjoyed every minute of it.

Give my regards to Frank.

13 April 1965

Mr. Harold E. Hill
Vice President
National Association of Educational Broadcasters
1346 Connecticut Avenue
Washington, D. C. 20036

Dear Harold:

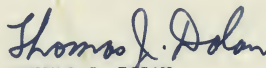

I am in receipt of your recommendations and comments, and I appreciate your help in this matter. I will sit down and outline more specific requirements for the present and get back to you as soon as I can.

I am using this letter for two purposes. One is to let you know that I received the above noted letter, and secondly to send you some additional information reference NAEB membership for military organizations. This serves as a follow-up to my letter to Bill Harley on 4 March, and your reply on 16 March. It seems as though your Member Relations Director, Mrs. Templeton, has resolved the problem with an Educational Associate Membership (see attached copy of her letter). The answer provided seems to fill the bill for military memberships both price-wise and responsibility-wise. We would not be able to vote or participate to the same degree as other institutional members, which as a military installation we cannot do anyway; therefore this could be the very answer we have been looking for.

If the Educational Associate seems to solve the problem as far as you are concerned, I would be able to give you a list of contacts who can act on this type membership.

As planning develops here on our study, I will be in touch with you again.

Sincerely,

THOMAS J. DOLAN
Education Specialist

June 2, 1965

Mr. R. J. Jansen
Applications Engineer
Ball Brothers Research Corporation
Boulder Industrial Park
Boulder, Colorado

Dear Mr. Jansen:

We are very glad to hear of your interest in this Association. ^{unfly} Enclosed is a booklet which describes the aims, activities and purposes of the NAEB. Also enclosed are copies of some of our publications. ^{join my} ~~our Association~~ ~~to NAEB~~ ~~Association~~ ~~NAEB~~ ~~Association~~

The National Association of Educational Broadcasters is the only professional and trade association serving the field of educational broadcasting. Our members represent more than four hundred noncommercial radio and television stations, production centers, and closed-circuit educational broadcasting installations, and more than 1000 individual members who are seeking to promote educational, cultural, and public service broadcasting. Also included in the membership are approximately one hundred schools and universities, associations, commercial stations, and industrial firms which are a part of the expansion and development of education via the broadcasting media.

It would be an honor to welcome (Ball Brothers Research Corporation) into membership in the NAEB as an Industrial Associate. Your company would be joining such firms as AT&T, RCA, GE and 3M in showing an interest in educational broadcasting and a willingness to assist in a small way in the work of educational broadcasting's national organization. Our Industrial Associates, as a contribution to the national educational television and radio movement, pay dues of \$500 annually. They also receive certain tangible benefits in return for these dues.

A brief summary of these benefits would include the 25% discount we give our Industrial Associates on exhibit space reserved at the NAEB annual convention. Industrial Associates receive multiple copies of our periodicals, as well as the various reports we publish from time to time, receive special rates for advertising in some of our publications, are listed in a special listing two or three times a year in our Journal, and are listed in our Directory of Members.

This is but a bare outline. In addition, although we do not attempt to persuade our members to buy from our Industrial Associates

June 2, 1965

in preference to other concerns, it is only reasonable to presume that educational broadcasters, often struggling on minimum budgets, would prefer to give their business to those commercial concerns which have evinced a sincere interest in the welfare and furtherance of educational broadcasting. Industrial Associates also are considered "part of the family" at our Regional Meetings and annual conventions and thus are able to chat more intimately with our members. Representatives of our Industrial Associates are invited to attend most of our seminars and workshops and thus meet with NAEB members on a very informal basis.

I hope that it will be our privilege to welcome (Ball Brothers) to our Association as an Industrial Associate. There is no membership application to complete for this category of membership. All we need is a letter from you stating your intention of joining. We will bill you as you wish, or you can send your membership fee along with your letter.

If you have any further questions, please do not hesitate to get in touch with us.

Sincerely,

Harold E. Hill

Gentlemen:

Ball Brothers Research Corporation is actively engaged in the manufacture of television equipment and we would be interested in learning about the requirements necessary to belong to the NAEB as a member or as an associate, whichever might be the case. Could you please send the necessary information and forms that we might proceed in becoming affiliated.

Thank you for your attention to this matter.

Sincerely yours,

R. J. Jansen

Mr. Thomas J. Dolan
ATIT-SCH-EV
USCONARC
Fort Monroe, Virginia 23351

Dear Tom:

Believe it or not, we now have an "official home" for military members:

At its meeting last week in Columbus, Ohio, the NAEB Board of Directors approved the establishment of a Military Associate category, with annual dues of \$35. Any, like Joe Jordan, who might have joined the Association as Educational Associates will not automatically be transferred over to the new category of membership by Mrs. Templeton.

We will soon begin to undertake a "membership drive" for military members and will appreciate any help you or your compatriots can give us. Once we have several members in this category, there is no reason why the group could not elect a chairman and/or a steering committee to serve as liaison to the NAEB staff and board.

Sincerely,

Harold E. Hill

Dear Harold:

Thanks for your letter of 10 June and the information pertaining to the "official home" for military members.

I have attached a list of the service schools and Army training centers which may be of help when you undertake your membership drive. In this respect, I would recommend you address any correspondence to the Director of Instruction for specific service schools and to G3 for the Army training centers.

Sincerely,

November 17, 1965

Mr. Edward A. Altschuler
President
Film Cartridge Productions, Inc.
113 North San Vicente Boulevard
Beverly Hills, California 90211

Dear Mr. Altschuler:

I am sorry for the delay in answering your recent letter, but as my secretary informed you, I have been on the road quite a bit recently.

There are two ways in which commercial concerns can affiliate with the NAEB. Those engaged in the manufacture and/or sale of broadcast, or broadcast affiliated, equipment may become Industrial Associates. In this category we have such firms as Ampex, RCA, GE, 3M, and numerous others.

However, I am guessing that your firm is not actually eligible for this category, therefore you can become Sustaining Associates. This category is open to any industrial concern interested in furthering educational broadcasting through cooperation with the NAEB. Dues are \$200 annually.

Sustaining Members receive copies of our bi-monthly journal (a professional journal in the field of educational broadcasting), the monthly Newsletter, miscellaneous reports of seminars and research activities, and other materials we release from time to time. Under separate cover I am sending you a sampling of these materials.

In addition, of course, affiliation with the NAEB provides an industrial firm an opportunity to mingle with educational broadcasters as "one of the family" at our annual convention, our regional meetings and other seminars we hold from time to time. I suppose you might also say such affiliation

Mr. Edward A. Altschuler
November 17, 1965
Page #2

serves as a "status symbol", in that not only our members but outsiders as well tend to think more favorable of industrial concerns who evince their interest in educational broadcasting in this "practical" way.

I realize that you may have questions, and I will be happy to answer them, but I did want to inform you as to possible methods of affiliation and to send you some samples of our materials.

Sincerely,

Harold E. Hill

Dear Mr. Harley:

Film/Tape Cartridge Productions is a new company established for the purpose of preparing Audio-Visual Programs for sales and management training, educational, and sales presentation use.

We are most interested in obtaining information regarding your organization and its membership. We are interested in joining those organizations in the Audio-Visual Field whose interests are compatible with our own.

As producers of programs for store, office, home, factory, school, and automobile (our mobile tape cartridge library), we are anxious to associate ourselves with people in the profession.

I am enclosing some material about our company and my own background.

We look forward to hearing from you.

Sincerely yours,

Mobile Teaching

Rexall Drug Co. has pioneered a new idea in sales training. In 1963, they equipped every one of their 250 salesmen's cars with Autostereo tape cartridge players.

Each week, a tape cartridge was mailed from headquarters bringing the men in the field news of the company's current promotional program, new products and general news of company activities.

Results indicate the mobile teaching machine will zoom in popularity in 1965. A number of companies have contacted Jack Cummings, sales director, Special Products Division, Autostereo Corp., Van Nuys, regarding the use of the car tape players in company training programs.

Many salesmen spend up to 40% of their time traveling between calls. This time can be used to excellent advantage to learn more about company products, sales

programs, company policies and procedures.

The Autostereo player serves as an individual station on a "tape network" with programs designed to inform, entertain and educate.

Percy H. Whiting, reporter, editor, sales manager and former managing director of the Dale Carnegie Sales Courses, offers information on "The Five Great Problems of Salesmen and How to Solve Them" — a new book pub-

lished by McGraw Hill. According to Whiting, the five great problems of salesmen are:

- They fail to organize their day's work;
- They don't think creatively to solve their own or their customers' problems;
- They don't know how to answer objections;
- They can't motivate themselves;
- They lack the ability to communicate effectively.

A detailed method for selling by recognition of and mastery over these problems is presented. Each problem is described clearly with many of its ramifications, and the solution to each is presented in a straightforward manner, replete with anecdotes, dos and don'ts.

Rexall's exploration with the Autostereo tape player is an attempt to help salesmen solve these problems. It obviously is not the only technique or method, but it does beam the company message directly to the individual at a time when he can give his attention to the message — while driving from point to point.

To enhance the application of this mobile teaching machine, Ascon Management Corp. has developed a new teaching technique — including use of the Autostereo player in conjunction with modern concepts of psychology and programmed learning.

To all of this had been added entertainment production values in each taped program designed to compete with the best programs available on the auto radio.

Called "Autotrain," the new training system takes a page from Whiting's book and builds from there.

Karl Kraatz of the LA Home Show; Ed Altschuler of Ascon; Tom Jennings of JBL.

Showcase wired for sound

Over breakfast during the Los Angeles Show we asked industry members to consider the case of the Electronic Home that the Home Show will build.

HIGH FIDELITY TRADE NEWS held a breakfast during the Los Angeles Show to give industry members a chance to hear about an idea that's being kicked around for next year's Home Show.

For some time now, Ed Altschuler of Ascon Management Corp. has been talking to every group who would listen about his conviction that electronics must be promoted not as an unending string of semi-technical and technical devices, but as the new utility.

Talking to Karl Kraatz of the Los Angeles Home Show, he suggested the idea of their building a home wired to accept electronic systems for the annual affair. Kraatz liked the idea, so Altschuler went to Dan Felger, who had built Altschuler's new home. Would Felger be interested in building this Electronic Home for the Home Show?

Not only would he be interested, he wanted to build one for himself as a permanent model home.

That left only the question of the

equipment to be used. Some manufacturers of electronic gear offered their products for display without hesitation; but the high fidelity industry in general seemed to be dragging its feet.

Now Ed Altschuler is an old hi-fi man. Aside from writing for *High Fidelity TRADE NEWS* in its early days, he has been with such companies as Benjamin nad Concertone.

The breakfast gave him a chance to make his pitch (with a slide talk) to high fidelity manufacturers. Aside from Altschuler, Kraatz and Felger, the most active participants in the discussion included Avery Yudin of Benjamin, Jules Rubin of Concertone, Bill Thomas of J. B. Lansing, Bob Bowman of Tandberg, and Ken Nelson and Lee Solomon of *High Fidelity TRADE NEWS*.

Ed Altschuler opened the discussion by asking for specific comments from the manufacturers represented in the group on the display of their products in the Electronic Home.

Tom Jennings voiced what seemed

to be an immediate objection to several of his colleagues: "There are three links in the chain by which systems would get into homes in Southern California or similar markets—the decorator, the architect, and the builder. Any one of these can disrupt the chain, but none knows anything about electronics."

"Trying to reach the market this way, we are trying to slay the dragon from underneath his belly. The show can sell the consumer—that's the easy job. But you also have to sell the guy who's going to sell the consumer."

"That's the advantage of the Electronic Home in the Home Show," Ed replied, "it shows the system in context."

Avery Yudin objected to the unilateral decision by the builder what equipment would be used. "And once he's put something in the wall, that's it!"

"First of all," Ed countered, "we need something to make it possible for the consumer to get what he wants. Second, we need to let the consumer know that he shouldn't settle for anything but the best."

Ken Nelson asked Dan Felger, as a business man and as a builder whether he wouldn't tend to look at a product for its ability to jazz up the house, rather than as a specific brand that is supposed to be good. And if it gets selected in terms of which will deliver the most profit, shouldn't it go out for bids?

"I think you're missing the point," Dan replied. "We will put in a house what is necessary to sell it in a given price range. Obviously, a man buying a house for \$20 thousand will demand less than a man buying a house for \$30 or 40 thousand, and so on."

"I wouldn't know a hi-fi system from a doorbell; but this is something you have to sell to the consumer—not me. When people come knocking on our door, asking to buy a house in one of our developments, and they say, 'I saw such and such demonstrated at the Home Show—can you put it on this house?' we can't ignore it, at least not if we're getting 10 or 20 people out of 100 asking about it."

Karl Kraatz expanded on the way in which an exhibit in the Home Show puts an idea or a product directly before some 6,437 builders in the Southern California area, to say nothing of the national magazine coverage that is expected to result from the Electronic Home. To dealer objections that shows are visited only by those who are already sold, so that no increase in sales results, Kraatz retorted that that would be true only of regular commercial exhibits. "Now we're

going to take that commercial exhibit and put it into a house, to show the consumer what he can do and how to do it."

Tom Jennings felt that one inconsistency remained: "We have no distribution program through builders. And if you have a product that can't be properly distributed, you can forget the idea. That's why some of these home intercom companies have been able to come in and do a big volume—because they had an outlet to go to: the builder and the people who sell to builders."

"Hi-Fi is oriented to specialists; and there is no method of coexistence in this business. The builder wants a good markup, and I can't blame him—he needs it. But the dealer needs a markup and they can't both get it. There's not enough play with a product that's very expensive to begin with."

"We're going to go ahead," said Ed. "We'll go to you as individual manufacturers and say, 'Are you interested? We're going to install an entertainment system, a communications system, controls, special devices, luminous walls, devices to turn on the sprinklers and close the windows, a garage door opener, automatic light controls—to build an all-electronic home!'"

"We're going to say to the builders of America, 'Just give us wire—wire and plugs.' It's all I want to put across with Karl and with Danny."

"We're not interested in being a jobber or a wholesale outlet for your components," added Dan Felger. "Matter of fact, I don't even want to buy your components for the houses. You're going to sell these to the consumers."

The final question, voiced by Avery Yudin, was: With several manufacturers in each category of hi-fi product, how will you decide whose equipment gets displayed? First come, first served, was Ed's answer. If more than one wants to participate for a given

type of unit, maybe a rotation system could be worked out. But he pointed out that manufacturers like RCA and Sytvaria have been asking already. What the high fidelity industry doesn't supply, he implied, would have to come from the communications companies.

Lee Solomon, as publisher of *High Fidelity TRADE NEWS*, closed the meeting with our pledge not only to produce printed matter to tie in with the show, but to work for maximum dealer tie-in—to let the dealer know what promotion he can build on and to let the consumer know who to go to to get the equipment he needs to make his an Electronic Home.

January 24, 1966

Mr. James J. Howell
Allied Sound Company, Inc.
206-12th Avenue, South
Nashville, Tennessee

Dear Mr. Howell

We have received a letter from Miss Patsy Duncan of Allied Sound, requesting information about membership in the NAEB. She requested that this information be sent to your attention.

Business concerns may affiliate with the NAEB in either one of two categories. Those engaged in the manufacture and/or sale of broadcast or auxiliary equipment may become Industrial Associates, while other business firms, without such specific involvement in broadcast equipment, may become Sustaining Associates. We were unable to tell, from Miss Duncan's letter, which category would be applicable to Allied Sound.

The National Association of Educational Broadcasters is the only professional and trade association serving the field of educational broadcasting. Our members represent more than four hundred educational radio and television stations, production centers and closed-circuit installations; more than 2000 individual members who are engaged in or seeking to promote educational, cultural, and public service broadcasting; and over one hundred schools, universities, associations, commercial stations, and industrial firms which are a part of the expansion and development of education via the broadcast media. I am enclosing a booklet which will tell you more about the aims and activities of the Association. Also enclosed are copies of some of our publications.

As a Sustaining Associate, your company would be joining such firms as National Community Television Association, RTA International, Crowell-Collier Publications, and the National Broadcasting Company.

Our Sustaining Associates, as a contribution to the national educational broadcasting movement, pay dues of \$200 annually. Industrial Associates pay \$500 annually. Sustaining and Industrial Associates also receive certain tangible benefits in return for those dues.

A brief summary of these benefits would include: multiple copies of our publications as well as the various reports we publish

Mr. James J. Howell

-2-

January 24, 1966

from time to time; special rates for advertising in some of our publications; for the Industrial Associates, a reduced rate for exhibit space taken at our annual convention; and perhaps most important, becoming "part of the family" at our Regional and National meetings, thus permitting more informal and intimate conversations with our members. In addition, although we do not attempt to persuade our members to patronize our Sustaining and Industrial Associates in preference to other concerns, it is only reasonable to presume that educational broadcasters, often struggling on minimum budgets, would prefer to give their business to those commercial concerns which have evinced a sincere interest in the welfare and furtherance of educational broadcasting.

We hope that you will consider affiliating with us in the educational broadcasting movement. If you have further questions, please do not hesitate to get in touch with me.

Sincerely,

Harold E. Hill

Dear Mr. Merklein:

Miss Susan Gallagher of our staff has told us of your interest in a Sustaining membership in the NAEB for Time-Life Broadcast, Inc. We are very pleased to hear of this interest and are forwarding membership information to you as you have requested.

The National Association of Educational Broadcasters is the only professional and trade association serving the field of educational broadcasting. Our members represent more than four hundred educational radio and television stations, production centers and closed-circuit installations; more than 2000 individual members who are engaged in or seeking to promote educational, cultural, and public service broadcasting; and over one hundred schools, universities, associations, commercial stations, and industrial firms which are a part of the expansion and development of education via the broadcast media. I am enclosing a booklet which will tell you more about the purposes and activities of the Association. Also enclosed are copies of some of our publications.

As a Sustaining Associate, your company would be joining such firms as National Community Television Association, Crowell-Collier Publications, RTA International, the National Broadcasting Company, etc. in showing an interest in educational broadcasting and a willingness to assist in the work of educational broadcasting's national organization. Our Sustaining Associates, as a contribution to the national educational broadcasting movement, pay annual dues of \$200. They receive certain tangible benefits in return for these dues.

A brief summary of these benefits would include reduced rates at our annual convention and receipt of multiple copies of our periodicals, as well as the various reports we publish from time to time; special rates for advertising in some of our publications; invitations to participate in our regional meetings and workshops; and listing in our educational broadcasting directory.

Mr. Frank M. Merklein

March 3, 1966

We sincerely hope that it will be our privilege to welcome Time-Life Broadcast, Inc. to our Association as a Sustaining Associate. If your company decides to affiliate with the NAEB, all we would need from you is an official letter notifying us of your decision. An application for Individual membership in the NAEB is also enclosed since you evinced an interest in a personal membership.

If, after reviewing the enclosed materials, you should have any further questions about the NAEB, please do not hesitate to contact me.

Sincerely,

Harold E. Hill

Mr. Truman Cleveland
1735 Birmingham Boulevard
Birmingham, Michigan 48009

Dear Mr. Cleveland:

Your check for \$100 for life membership in the NAEB
has been received in this office.

A proposal for life membership was made last year;
however, the Staff and Board decided that the establish-
ment of this membership category was not advisable at
this time. Therefore, we are returning your check to
you with the hope that you will continue to take out
yearly memberships until such time as life membership
is established.

We very much appreciate this evident interest in the
NAEB and its future.

Sincerely,

Mary Lynn Moody

Mr. Richard J. Zeitler
Manager
TELE-BEAM
The Kalart Company, Inc.
Plainville, Connecticut 06062

Dear Mr. Zeitler:

I am sorry for the delay in answering your letter of February 15 regarding membership in the NAEB and your interest in exhibiting at our annual convention. Before writing you, however, I wanted to have printed brochures which outline the costs and regulations for exhibiting.

The National Association of Educational Broadcasters is the only professional and trade association serving the field of educational broadcasting. Our members represent more than four hundred non-commercial radio and television stations, production centers, and closed-circuit educational broadcasting installations, and more than 2000 individual members who are seeking to promote educational, cultural, and public service broadcasting. Also included in the membership are approximately one hundred schools and universities, associations commercial stations, and industrial firms which are a part of the expansion and development of education via the broadcasting media.

It would be an honor to welcome TELE-BEAM into membership in the NAEB as an Industrial Association. Your company would be joining such firms as Sarkes Tarzian, RCA, 3M and Continental Electronics Products, etc., in showing an interest in educational broadcasting and a willingness to assist in a small way in the work of educational broadcasting's national organization. Our Industrial Associates, as a contribution to the national educational radio and television movement, pay dues of \$500 annually.

I am enclosing a brochure which describes in brief the aims and activities of the NAEB. Also enclosed are copies of some of our publications. As an Industrial Associate of the NAEB, you would receive multiple copies of our periodicals, as well as the various reports we publish from time to time and you would also receive special rates for advertising in some of our publications.

Mr. Richard J. Zeitler

- 2 -

March 14, 1966

The attached exhibit brochure will, I think, answer any questions you might have about requirements for exhibiting at our convention. You will note that further correspondence about the show should be sent to our show manager, Mr. Frank Masters of Trade Associates, Inc. Mr. Masters reports to me that about half of our space has already been sold, so I would suggest that you get in touch with him right away if you do wish to exhibit.

We hope that it will be our privilege to welcome you to our Association as an Industrial Associate. There is no membership application to complete for this category of membership; an official letter from you stating your desire to join will be sufficient.

If you have further questions about membership, please do not hesitate to get in touch with us.

Sincerely,

Mary Lynn Moody
Assistant to the Vice President
and Convention Coordinator

March 15, 1966

Mr. E.A. Wheeler
Administrator
Education and Training Department
Bell Telephone Laboratories
Murray Hill, New Jersey 07971

Dear Mr. Wheeler:

It has been brought to our attention that you are interested in knowing about the NAEB, its activities and services to its members.

The National Association of Educational Broadcasters is the only professional and trade association serving the field of educational broadcasting. Our members represent more than four hundred educational radio and television stations, production centers and closed-circuit installations; more than 2000 individual members who are engaged in or seeking to promote educational, cultural, and public service broadcasting; and over one hundred schools, universities, associations, commercial stations, and industrial firms which are a part of the expansion and development of education via the broadcast media. I am enclosing a booklet which will tell you more about the aims and activities of the Association. Also enclosed are copies of some of our publications.

Commercial concerns may affiliate with the NAEB in either of two categories. Those engaged in the manufacture and/or sale of broadcast or auxiliary equipment may become Industrial Associates, while all other business firms would become Sustaining Associates. Among our Industrial Associates are 3M, RCA, GE, Sarnes Tarzian, AT&T, etc. and Sustaining members include RTA International, Crowell-Collier Publications, NBC, National Community Television Association and others.

Our Industrial Associates, as a contribution to the national educational broadcasting movement, pay dues of \$500 annually. The annual contribution for Sustaining members is \$200. Both membership categories receive certain tangible benefits in return for those dues.

A brief summary of these benefits would include: multiple copies of our publications; special rates for advertising in some of our publications; for the Industrial Associates, the first opportunity to select exhibit space at our annual convention; and perhaps most

Mr. E. A. Wheeler

- 2 -

March 15, 1966

important, becoming "part of the family" at our regional and national meetings, thus permitting more informal and intimate conversations with our members. In addition, although we do not attempt to persuade our members to patronize our Sustaining and Industrial Associates in preference to other concerns, it is only reasonable to presume that educational broadcasters, often struggling on minimum budgets, would prefer to give their business to those commercial concerns which have evinced a sincere interest in the welfare and furtherance of educational broadcasting.

We hope that you will consider affiliation with the NAEB in its continuing efforts to expand and improve educational broadcasting throughout this country. If you have further questions, please do not hesitate to get in touch with us.

Sincerely,

Harold E. Hill
Vice President

August 3, 1965

Mr. Henry Shapiro
Executive Vice President
Electronics, Missiles and Communications, Inc.
160 East Third Street
Mt. Vernon, New York

Dear Mr. Shapiro:

We are very pleased to hear, from Mr. Frank Masters of Trade Associates, Inc., that your company is interested in affiliation with the NAEB.

It would be an honor to welcome Electronics, Missiles and Communications, Inc. into membership in the NAEB as an Industrial Associate. Your company would be joining such firms as AT&T, RCA, GE and Sarkes Tarzian, Inc., in showing an interest in educational broadcasting and a willingness to assist in a small way in the work of educational broadcasting's national organization. Our Industrial Associates, as a contribution to the national educational television and radio movement, pay dues of \$500 annually. They also receive certain tangible benefits in return for these dues.

A brief summary of these benefits would include the 25% discount we give our Industrial Associates on exhibit space reserved at the NAEB annual convention. Industrial Associates also have priority in the reserving of exhibit space. They receive multiple copies of our periodicals, as well as the various reports we publish from time to time, receive special rates for advertising in some of our publications, are listed in a special listing two or three times a year in our Journal, and are listed in our Directory of Members.

This is but a bare outline. In addition, although we do not attempt to persuade our members to buy from our Industrial Associates in preference to other concerns, it is only reasonable to presume that educational broadcasters, often struggling on minimum budgets, would prefer to give their business to those commercial concerns which have evinced a sincere interest in the welfare and furtherance of educational broadcasting. Industrial Associates are also invited to attend our regional meetings and annual conventions, as well as our seminars and workshops, where they can meet with NAEB members of a very informal basis.

I hope that it will be our privilege to welcome Electronics, Missiles, and Communications, Inc. to our Association as an Industrial Associate. There is no membership application to complete for this

Mr. Henry Shapiro

August 26, 1966

Mr. Ward Deutschman
Harvey Radio Company
60 Crossways Park West
Woodbury, Long Island,
New York 11797

Dear Mr. Deutschman:

As an extension to our telephone conversation this afternoon, enclosed is a booklet which briefly describes the aims, activities and purposes of the NABE. Also enclosed are copies of some of our publications together with a list of publications which are available.

Briefly, the National Association of Educational Broadcasters is the only professional and trade association serving the field of educational broadcasting. Our members represent more than four hundred noncommercial radio and television stations, production centers, and closed-circuit educational broadcasting installations, and more than 2,000 individual members who are seeking to promote educational, cultural, and public service broadcasting. Also included in the membership are approximately one hundred schools and universities, associations, commercial stations, and industrial firms which are a part of the expansion and development of education via the broadcasting media.

It would be an honor to welcome Harvey Radio into membership in the NABE as an Industrial Associate. Your company would be joining such firms as AT&T, RCA, GE and 3M in showing an interest in educational broadcasting and a willingness to assist in a small way in the work of educational broadcasting's national organization. Our Industrial Associates, as a contribution to the national educational television and radio movement, pay dues of \$500 annually. They also receive certain tangible benefits in return for these dues.

A summary of these benefits would include the 25% discount we give our Industrial Associates on exhibit space reserved at the NABE annual convention. Industrial Associates receive multiple copies of our periodicals, as well as the various reports we publish from time to time, receive special rates for advertising in some of our publications, are listed in a special listing two or three times a year in our Journal, and are listed in our Directory of Members.

August 26, 1966

This is but a bare outline. In addition, although we do not attempt to persuade our members to buy from our Industrial Associates in preference to other concerns, it is only reasonable to presume that educational broadcasters, often struggling on minimum budgets, would prefer to give their business to those commercial concerns which have evinced a sincere interest in the welfare and furtherance of educational broadcasting. Industrial Associates also are considered "part of the family" at our Regional Meetings and annual conventions and thus are able to chat more intimately with our members. Representatives of our Industrial Associates are invited to attend most of our seminars and workshops and thus meet with NAEB members on a very informal basis.

I hope that it will be our privilege to welcome Harvey Radio to our Association as an Industrial Associate. There is no membership application to complete for this category of membership. All we need is a letter from you stating your intention of joining. We will bill you as you wish, or you can send your membership fee along with your letter.

Regarding exhibiting at our annual convention, I have checked with our Convention Coordinator, and she tells me that both distributors and manufacturers are eligible to exhibit. She suggested that if you are interested in exhibiting at our upcoming Convention in Kansas City, October 23-26, that you contact our Exhibit Manager immediately. It is her understanding that there are only four remaining booths, so perhaps you would want to call him rather than rely on the U.S. mails. He is Frank Masters, Trade Associates, Inc., 5151 Wisconsin Avenue, N.W., Washington, D.C. The telephone number is 362-2794. If you are unable to speak to Mr. Masters, his secretary, Mrs. Duty will be able to help you.

I have also enclosed some information about Individual Membership in our organization. If you wish to become an Individual Member, you have only to fill in the enclosed application and return it to me together with a check in the amount of \$15.00. We will see that you are added to our membership list immediately so that you may begin to receive the publications to which membership entitles you.

It was good talking to you today, and I am hopeful that Harvey Radio will decide in favor of becoming an Industrial Associate. If you have any questions, or need any additional information, please do not hesitate to get in touch with us.

Sincerely,

Sondra Olson
Membership Associate

Mr. Leonard Gumly
Information Display Specialist
Hoffmann-La Roche Inc.
Nutley 10, New Jersey

Dear Mr. Gumly:

Thank you for your interest in the National Association of Educational Broadcasters as expressed in your letter of May 20, 1966. Enclosed is a booklet which briefly describes the aims, activities and purposes of the NAEB. No doubt you have already received this in connection with your recent application to join the NAEB as an Individual Member. Also enclosed are copies of some of our publications together with a list of publications which are available.

Briefly, the National Association of Educational Broadcasters is the only professional and trade association serving the field of educational broadcasting. Our members represent more than four hundred noncommercial radio and television stations, production centers, and closed-circuit educational broadcasting installations, and more than 2,000 individual members who are seeking to promote educational, cultural, and public service broadcasting. Also included in the membership are approximately one hundred schools and universities, associations, commercial stations, and industrial firms which are a part of the expansion and development of education via the broadcasting media.

It would be an honor to welcome Hoffmann-La Roche into membership in the NAEB as an Industrial Associate. Your company would be joining such firms as AT&T, RCA, GE and 3M in showing an interest in educational broadcasting and a willingness to assist in a small way in the work of educational broadcasting's national organization. Our Industrial Associates, as a contribution to the national educational television and radio movement, pay dues of \$500 annually. They also receive certain tangible benefits in return for these dues.

A summary of these benefits would include the 25% discount we give our Industrial Associates on exhibit space reserved at the NAEB annual convention. Industrial Associates receive multiple copies of our periodicals, as well as the various reports we publish from time to time, receive special rates for advertising in some of our publications, are listed in a special listing two or three times a year in our Journal, and are listed in our Directory of Members.

September 1, 1966

This is but a bare outline. In addition, although we do not attempt to persuade our members to buy from our Industrial Associates in preference to other concerns, it is only reasonable to presume that educational broadcasters, often struggling on minimum budgets, would prefer to give their business to those commercial concerns which have evinced a sincere interest in the welfare and furtherance of educational broadcasting. Industrial Associates also are considered "part of the family" at our Regional Meetings and annual conventions and thus are able to chat more intimately with our members. Representatives of our Industrial Associates are invited to attend most of our seminars and workshops and thus meet with NABE members on a very informal basis.

I hope that it will be our privilege to welcome Hoffmann-La Roche to our Association as an Industrial Associate. There is no membership application to complete for this category of membership. All we need from you is a letter stating your intention of joining. We will bill you as you wish, or you can send your membership fee along with your letter.

Mr. Ward Deutschman
Harvey Radio Company
60 Crossways Park West
Woodbury, Long Island,
New York 11797

Dear Mr. Deutschman:

On August 26 I wrote to you regarding the advantages of an Industrial Associate membership in the NAEB. As I have heard nothing from you to date, I am wondering if you have questions about the material which was sent at that time. If this is the case, please do not hesitate to let me know what your questions and/or hesitations are.

With the rapid approach of our annual convention, I know you will want to consider a membership before then, whether you enroll as an Industrial Associate or simply as an Individual Member. In any case, I look forward to hearing from you shortly.

Sincerely,

Sondra Olson
Membership Associate

Prospective
Military Associate

September 20, 1966

Captain T. J. Ryan
Commanding Officer
Communication-Electronics School Battalion
Marine Corps Recruit Depot
San Diego, California 92140

Dear Captain Ryan:

My apologies for the delay in replying to your letter requesting information about associate membership in the NAEB. I have been away on vacation, and unfortunately, your letter was buried in a pile of papers and was only unearthed this morning.

During the past few years, many military installations have expressed an interest in becoming a member of the National Association of Educational Broadcasters. However, there was no appropriate membership category for them since the cost of institutional membership ranges from \$100 - \$700, and military installations found it impossible to justify this amount in their budgets.

Therefore, the NAEB Board of Directors approved last year the establishment of a Military Associate category of membership, with annual dues of \$45.00. This fee entitles Military Associates to monthly copies of our Newsletter, bi-monthly copies of our Journal, along with various other NAEB publications and reports which are sent to our members from time to time. You would also be invited to attend and participate in our annual convention at a low membership rate, and attend workshops, seminars and regional meetings where you would meet with others operating closed-circuit installations all over the world.

The NAEB Convention is being held this year, October 23 - 27, at the Muehlebach Hotel in Kansas City, Missouri. I am enclosing a brochure which explains the purpose of this convention and also describes the aims, activities and purpose of the NAEB. An Armed Forces Meeting is being scheduled for Tuesday, October 25th, from 2:00 to 5:00 p.m. For additional information about this meeting you may want to contact Dr. Joseph H. Kanner, Education Specialist, Pictorial & Audio-Visual, U.S. Army, 2100 14th Street, North Arlington, Virginia.

Captain T. J. Ryan

page 2

September 20, 1966

If, after reviewing the enclosed material, you should have any questions, please do not hesitate to get in touch with me. We hope that you will join us at the Kansas City Convention in October, and we will look forward to welcoming you into membership in the NAEB.

Sincerely,

Sondra Olson

285 Madison Avenue
Madison, New Jersey

Dear Mr. Pratt:

We are very pleased to hear of your interest in the organizational membership of the NAEB. Enclosed is a brochure which will give you some indication of the services offered by the NAEB to its members. Membership in this association will entitle you to receipt of our monthly Newsletter and the bi-monthly Journal along with various other publications and reports which are sent to our members from time to time.

Membership would also provide you with the opportunity to attend workshops, seminars and our annual convention, at which time you can swap knowledge with other educational broadcasters from all over the world.

If, after reviewing the enclosed materials, you should have further questions, please do not hesitate to get in touch with us. I am unable to suggest the specific category of membership which would be most applicable to your needs, but if you will indicate this by return mail, I will be in a better position to describe the many benefits to which you will be entitled as an NAEber.

Thank you, and we look forward to welcoming you as a new member in the NAEB.
